

Meet us at Pro Food Tech March 26-28 McCormick Place, Chicago

Listen to **'Productivity leaps with the Redzone Production System'**
The Disruption Zone: **Tuesday March 26, 1.30pm**

If you are interested in improving productivity and food safety at your plant, impacting the culture of your operations and lowering operational costs come and meet us while you're at **Pro Food Tech BOOTH #533**.

Ask about our Productivity Trial

Our Productivity Trial is a risk free trial where you can see how many points of efficiency you could expect to achieve. Every company who has taken the trial so far has achieved an average increase of 7.8% points of OEE and a 13.3% increase in productivity.

Compare yourselves against other manufacturers

We all want to know how our peers and competitors are doing and what results they're achieving and how. So come along and find out for yourselves.

See Redzone in action, meet some of our customers and find out how our community are achieving average results like these in under 90 days.

13.3%

Productivity increases

2019 Food & Beverage Productivity Benchmark

Our Benchmark report summarizes the results of a controlled study which included 400 mid-sized Food, Beverage & CPG plants in North America. It shows the effect on productivity that occurs with the introduction of a Production System; incorporating lean production techniques with a mobile application to make them stick.

Productivity & Food Safety Roadshows

We host events year round at various Food, Beverage and CPG plants around the country. Come meet other companies like yours, hear their success stories and take part in a panel discussion with manufacturers who have all achieved improvements in both productivity and shop floor culture using a Production System approach.

Click [HERE](#) to see when our next event is.

Connect with the Redzone Community of Customers

If you are interested in being introduced to other Food, Beverage and CPG manufacturers customers in our Redzone Community please come along and let us know and we'll make the introductions. You can find out what their CI/Food Safety challenges were and how they overcame them.
