

# Empowering Frontline Workforces with the Data and Insights They Need to Succeed

Manufacturers are deploying digital technology to democratize data access and provide employees with the insights they need to drive productivity every day.

**The QAD Redzone Connected Workforce Solution provides rich data and analytics for everyone, from the C-suite to the shop floor.**

See who's using our tools, what they're doing – and what they're achieving together.

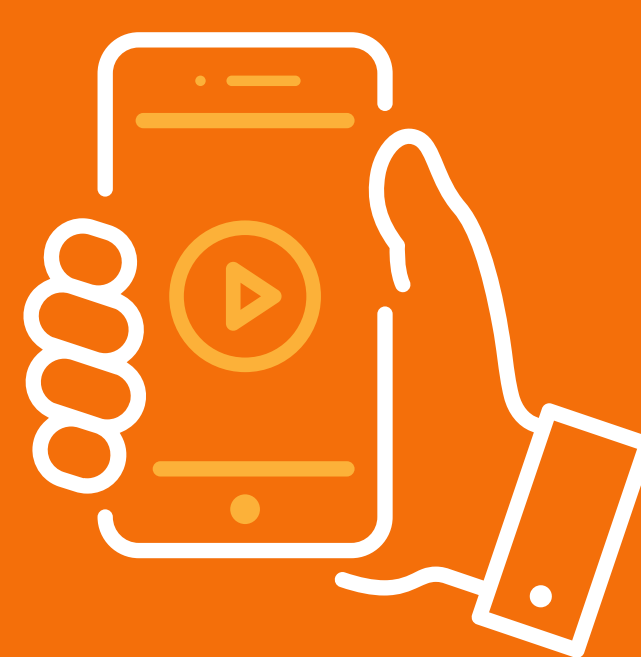

## Introducing QAD Redzone

A mobile, social technology that connects everyone at your company and streamlines access to data and analytics.

Redzone collects availability and performance data from sensor-tagged machines, it then surfaces data in real-time and provides visualizations and reports that everyone can access.

**End the era of 'tombstone data' – insights you get tomorrow about today's problems, when the issues have already changed!**

## Frontline Workers Use Real-Time Data to Win the Day

With Redzone, your operators, quality, and maintenance teams are finally able to:

- Gain easy access to metrics they need, such as top losses and OEE.
- Review data on tablets or smartphones, maintaining workflow.
- See production progress in real-time with red, yellow, and green indicators.
- Brainstorm solutions, across teams and functions.

## Factory Managers Use Data to Plan Projects

Factory leaders need access to real-time and trend data to plan projects. They use this information to:

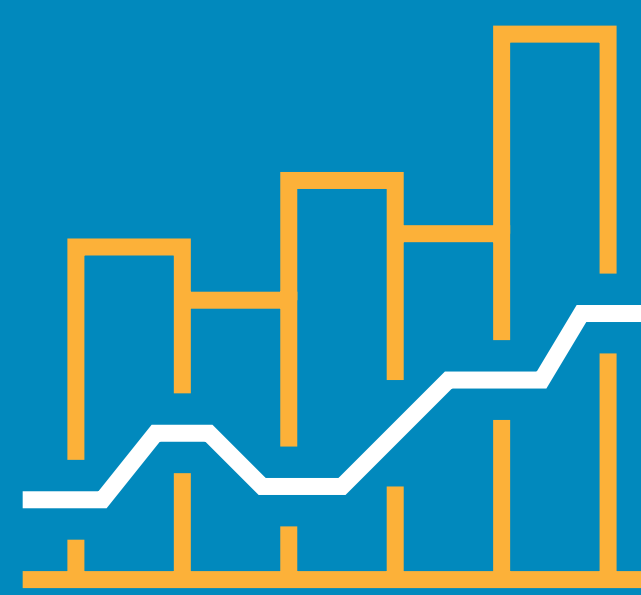

- Review patterns across different timeframes.
- Schedule teams for work.
- Plan Kaizens to solve production, quality, and maintenance problems at scale.
- Schedule proactive maintenance to keep machines up and running.

## Senior Leaders Leverage Insights to Plan Growth and Operational Improvement

Senior executives need insights from data and KPIs to:

- Plan growth and operational budgets.
- Allocate capital effectively.
- Review capacity and prioritize corrective actions on individual lines and across factories.
- Evaluate on-time, in-full production trends.

## Leverage These Different Analytics Capabilities

We recognize that manufacturers have different data needs and levels of analytics maturity. That's why we offer:

- **Web dashboards** – Get out-of-the-box capabilities, with 40 reports you can use on Day 1 of implementation.
- **Custom reporting** – Develop rich insights tailored to your business with our hosted business intelligence (BI) server, templates, and training.
- **Integration tools** – Already have a BI tool in place? Use our integration tools to enable faster queries and multi-site data views. Data from cloud databases is integrated into a data lake.
