

How QAD Redzone Transforms Teams – and Your Manufacturing Business

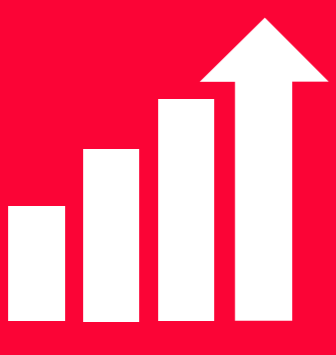

Machine breakdowns, overworked teams, and constant quality issues don't need to be your daily reality.

Instead, you can turn your factories, people, and processes into a source of competitive advantage with the QAD Redzone Connected Workforce Solution.

Here's your four-part strategy for success:

1 Drive productivity and OEE

Every manufacturer has focus lines that drive outsized revenue. Keeping these lines up and performing is a top priority. Across 1,500 manufacturers, companies deploying Redzone achieved the following in just 90 days:

Increased productivity by **29%**

Boosted overall equipment effectiveness by an average of **14 points**

Gained labor savings of **\$728K to \$1.4M**

And gains continue to accrue months and years after deployment!

“We want to be able to track more data in real-time so that our teams can react faster and continuously improve our operations. So, as our competitors evolve, we will as well.”*

Matt Osterhaven, Vice President of Finance, Haviland Enterprises, Inc.

The following strategies may take more than 90 days but yield outstanding results.

Fix reliability issues

If it's challenging to report maintenance issues, operators won't. Lagging processes can translate to frequent and costly downtime.

With Redzone, production teams can use video to capture issues – and submit them digitally to maintenance. Operators and maintenance teams work together to identify and solve reliability issues.

With **'5 Senses'**, employees use sight, sound, smell, touch, and taste to detect maintenance issues.

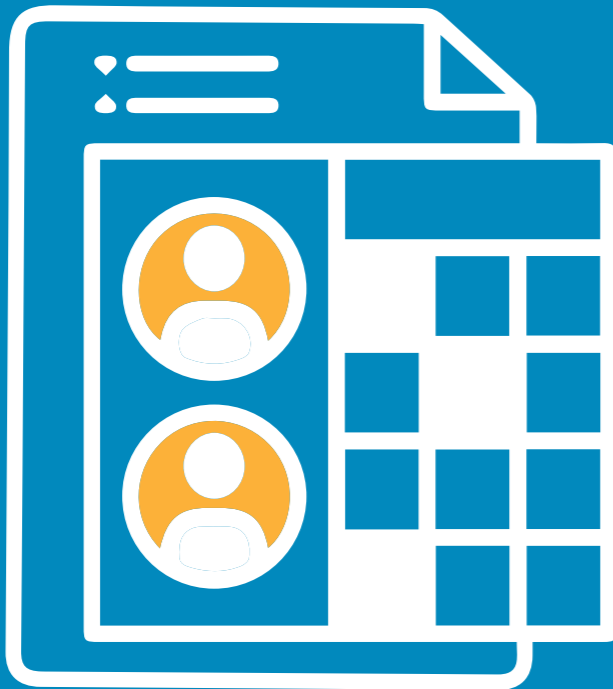

3 Become a compliance champion

Many companies have manual compliance processes, harming their ability to understand root causes, improve quality issues as they occur, and answer customer questions.

With Redzone, manufacturers **digitize compliance records**, use Bluetooth-enabled scales to weigh goods, and access visual records to evaluate product quality.

Unlock the power of learning

Teams want to learn to gain new skills, share knowledge, and progress their careers.

Redzone provides **digital skills matrices aligned to factory needs** and offers real-time access to knowledge resources, created by training teams and other workers.

Drive results in 90 days with QAD Redzone

Recognized by LNS Research and G2 for the strength of our solution, QAD Redzone connects workforces with social, mobile technology and uses proven processes to drive change.

We share **strategies and results** in our 2023 Productivity Benchmark Report.
